Synerg Solutions – Help Desk Ticket Simulation Template

Ticket ID	Issue Description	Troubleshooting Steps	Root Cause	Resolution	Prevention	Risk Level
001	User cannot connect to Wi-Fi	1. Check if Wi-Fi is enabled on device. 2. Verify Wi-Fi password. 3. Restart router. 4. Check IP assignment.	Incorrect Wi-Fi password	Reset password and guide user	Educate user on correct password entry	🔴 High
002	Printer not printing	1. Check printer power and connection. 2. Verify network connection. 3. Check driver installation. 4. Restart printer spooler service.	Printer driver missing or offline	IInstall/Update driver and restart printer	Regularly update drivers and monitor printer status	🟡 Medium
003	Outlook not syncing	1. Verify internet connection. 2. Check account credentials. 3. Clear cache or temporary files. 4. Restart Outlook.	Account password expired or network issue	Update password and reconnect	Encourage regular password updates	🟡 Medium
004	Computer running slow	1. Check running programs in Task Manager. 2. Scan for malware. 3. Free disk space. 4. Restart system.	Too many background processes / low disk space	Close unnecessary apps, run disk cleanup	Schedule regular maintenance and updates	🟢 Low
005	Account locked out	1. Confirm username. 2. Attempt password reset. 3. Check account lockout policy.	Too many failed login attempts	Unlock account and reset password	Educate users on correct login procedures	🔴 High
006	VPN not connecting	1. Check internet connection. 2. Verify VPN credentials. 3. Restart VPN client. 4. Check firewall settings.	Incorrect credentials or firewall blocking VPN	Update credentials or adjust firewall rules	Ensure VPN software is updated and configured correctly	🔴 High

007	Blue screen error	1. Record error code. 2. Check recent driver/software installs. 3. Run Windows Memory Diagnostic.	Faulty driver or system file corruption	Roll back driver or perform system restore	Keep drivers updated and backup system regularly	🔴 High
008	Monitor not detected	1. Check cable connections. 2. Test monitor on another computer. 3. Update graphics driver.	Loose cable or outdated driver	Secure connection and update driver	Inspect cables periodically and update graphics drivers	🟡 Medium
009	Software installation fails	1. Check system requirements. 2. Verify admin permissions. 3. Ensure disk space is sufficient.	User lacks permission or incompatible system	Run as admin or upgrade system	Verify permissions and system compatibility before installation	🟢 Low
010	Unable to access shared drive	1. Check network connectivity. 2. Verify user permissions. 3. Ping server.	Permission denied or network issue	Grant proper permissions or reconnect to network	Review user access regularly	🟡 Medium
011	Mouse or keyboard not working	1. Check physical connections. 2. Test on another port/device. 3. Update drivers.	Faulty device or driver issue	Replace device or update driver	Regular device checks and driver updates	🟡 Medium
012	Audio not working	1. Check volume/mute settings. 2. Verify audio device selected. 3. Test with headphones/speakers. 4. Update audio driver.	Wrong output device selected or driver outdated	Select correct output or update driver	Keep drivers updated and educate users on device selection	🟢 Low
013	Cannot print to PDF	1. Verify PDF printer installed. 2. Check default printer settings. 3. Restart application.	PDF printer missing or misconfigured	Install PDF printer or set as default	Verify printer setup before installation of new software	🟢 Low
014	Wi-Fi keeps dropping	1. Check signal strength. 2. Restart router. 3. Update network adapter driver.	Weak signal or outdated driver	Move closer to router / update driver	Maintain strong network coverage and update drivers	🟡 Medium
015	Slow network on office laptop	1. Check Wi-Fi signal. 2. Run speed test. 3. Restart network adapter. 4. Check background downloads.	High bandwidth usage or weak signal	Limit background apps / reconnect to strong network	Educate users on bandwidth usage and monitor network health	🟢 Low
